

Background Vocals for Every Keyboardist

For keyboardists in need of great background vocals, the new VP-7 vocal processor is ready to sing! Create harmonies instantly with a microphone and a MIDI connection to the keyboard of your choice. It's simple. Just select a sound type from the front panel, and play. The Human Voice section provides rich and expressive choral backing by just playing the keyboard — no singing required. The Vocal Designer section can automatically generate two-voice or three-voice backing harmonies based on the lyrics that you sing into the microphone. And for classic robot-voice effects, the Vocoder button lets you instantly sound like a vintage vocoder.

- ▶ Generate vocal harmonies instantly
- ▶ Dedicated buttons for instant access to the preset sounds
- ▶ Four expressive human voice sounds, three Vocal Designer® choirs, plus vintage vocoder, echo and reverb

- ▶ Dedicated knobs for volume, mic level, harmony mix and Ambience level
- ▶ Bundled with DR-HS5 microphone (designed for Roland's Vocal Designer products)

DR-HS5
