USING A MAGNETIC TAPE SYSTEM
ROLAND SPACE ECHO RE-201

The Space Echo RE-201 has been heard on numerous recordings. By 1974, Roland was producing the Echo RE-201, which creates a space echo effect. The RE-201 has a total of 12 different echo settings (12 different echo levels can be selected). The RE-201 has a REVERB ONLY mode. The RE-201 is used in many recordings. A Roland Classic Rebirth & Reinvented

One of the most beloved echo effects ever made, the Roland RE-201 Space Echo, has been reborn as the BOSS RE-20 Twin Pedal! Roland and BOSS have recreated every sonic detail and nuance of the original. Experience the legendary tape-echo sound of the RE-201, and get "lost in space" with this retro-modern marvel.

● Uses COSM technology to faithfully simulate the characteristics of the famed Roland RE-201 Space Echo

● Reproduces the distinctive wow-and-flutter-induced wavering and classic compression obtained from magnetic-tape saturation

● Delay times can be set quickly and easily with the TAP input pedal

● Control REPEAT RATE, INTENSITY, ECHO LEVEL, and TWIST with an Expression pedal (sold separately)

● Virtual Tape Display produces a visual image of a running tape

● MODE SELECTOR offers 12 reverberation/echo effects through various combinations of three virtual playback heads and reverb

MODE SELECTOR	REPEAT				REVERB ECHO						REVERB ONLY

COSM

Once a musical instrument generates sound vibrations, it reaches the human ear through various mediating objects, each of which significantly affects the sound. The material and configuration of the instrument, the electric/magnetic amplifying system, the air and the reverberation of the room all affect the final sound. Sound modeling, the latest DSP technology, "virtually" reconstructs these objects. Roland's breakthrough Composite Object Sound Modeling (COSM[®]) uses the advantages of multiple modeling methods and succeeds in accurately emulating existing sounds, as well as producing sounds that have never before been created.
